

Amendments to the Claims:

Please amend the claims as set forth below.

50. (Currently Amended) A method of decontaminating a contaminated surface, the method comprising: spraying an electrically charged photosensitizer having aerosol droplets projected in a stream towards an object, said aerosol droplets being greater than 50 μm in diameter for precipitation onto the contaminated surface of a person-occupiable space, in an environment open to the person-occupiable space; illuminating the sprayed surface with light to cause chemical reactions to decontaminate the surface.
